SIMPLE EXPLANATIONS FOR COMPLICATED QUESTIONS

What's a Metaverse?

There are a lot of techy definitions out there, but we think this sums it up pretty well:

A metaverse is a virtual space where people can work, play, shop and socialize. It offers enhanced entertainment experiences, convenient shopping options, streamlined access to our money, and more creative ways in which we could represent ourselves online.

In short, it's all the things humans like to do together in real life, just online instead of the physical world.

What's Blockchain?

A blockchain is simply a distributed database that maintains a continuously growing list of ordered records, called blocks. These blocks are linked using cryptography.

What's an NFT?

NFT stands for Non-Fungible Token, which is just a fancy way of saying it's an ownership certificate of a digital asset.

What's the purpose of HyperNation?

To provide users with a decentralized platform to socialize from around the world and participate to earn. In this virtual multi-planet metaverse, users can connect with friends and collect multiple experiences including starting businesses. The HyperNation provides a fair chance to every resident in the galaxy, with the community being governed by users with HyperNation Dollar (HND) which is always equal to the US Dollar.

Do I have to refer people to participate and earn money?

Nope. It's completely optional

Can I start now and get more memberships later?

Yes, you can purchase as many memberships as you want anytime you want, they are all individual and in increments of 400.

SIMPLE EXPLANATIONS FOR COMPLICATED QUESTIONS

Is it possible I could lose my money?

Of course. Anything is possible, this is life. However, that doesn't mean it's likely. That said, you're already losing money. Every day the government prints more money and drives prices higher and higher. Cryptocurrency is the highest appreciating asset class in history. Purchasing a HyperNation membership gives you the ability to learn about crypto and blockchain while earning daily rewards and not being tied to the volatility of the cryptocurrency market though, so it's the best of both worlds.

Why is crypto better than Fiat currency?

Remember when your teeth fell out and you got some dollar bills for them? Well, let's say you took those dollar bills and bought some ice cream. Now let's say that an ice cream cone costs you \$1 this week. Then some very powerful old people wearing suits decided that they want to print a lot more dollar bills. That's called "inflation" and you have as good a chance at stopping that as you do stopping your little sister from annoying you. Which is precisely zero. So now there are twice as many dollar bills and a single bill is worth only half as much. Now you need \$2 to buy your ice cream! This is what us adults refer to as "some bullshit." So since those same suit-wearing old people can't just snap their fingers and magically make twice as much cryptocurrency, it's much better.... because you'll be able to buy more ice cream with it.
